

2010 Semester 1 HS Student Survey - Instruction

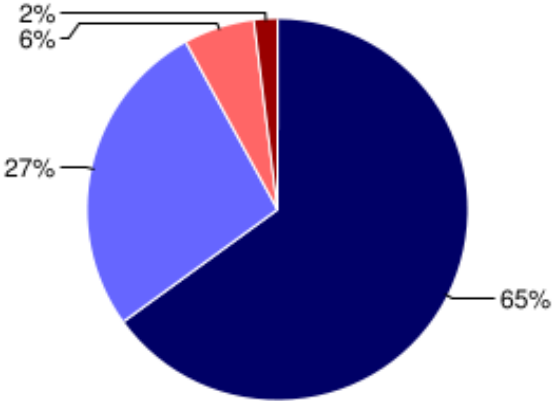

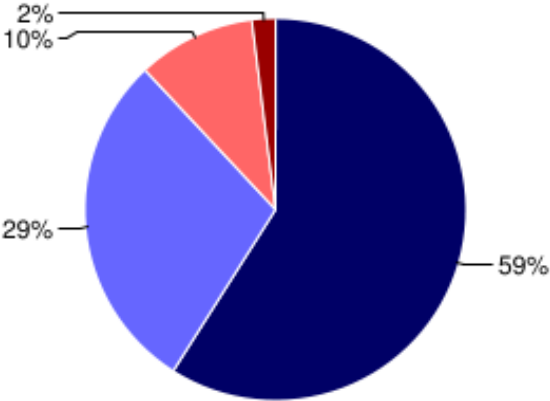

My teacher makes good use of class time. I know when I need help and I get it from my teacher when I ask for it.

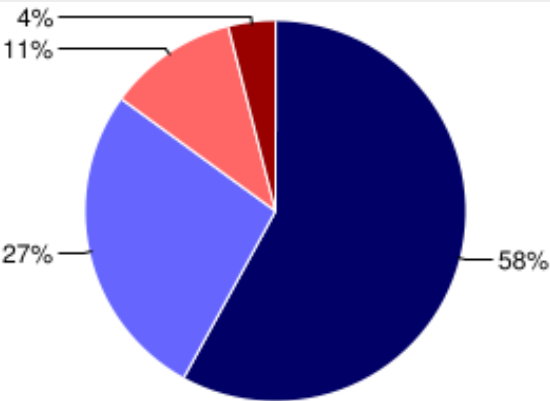

The amount of homework in this class is reasonable as compared to other classes. Homework assignments in this class are reasonably spread out throughout the year/semester/quarter.

My teacher uses a variety of teaching methods (lectures, presentations, group work, projects, presentations, etc.) appropriate for the type of class. I understand my teacher's explanations (of what we study, homework assignments, direction, etc.).

My teacher increased my interest in the subject.
